New Software Updates for eldoLED LED Drivers

Be sure to download the latest software updates for the eldoLED **FluxTool v4.5.26 and OT Programmer V3.3.1.0.** The FluxTool software enable you to easily customize LEDcode compatible eldoLED drivers for your application. The OT Programmer is a software configuration tool that enables you to program the parameters of OPTOTRONIC® by eldoLED drivers, exclusive to North America. For a detailed list of changes made in this version of the software, please reference the Release Notes found online.
