STREAMLITE™ - Improved and Expanded Dotless Tape Light

STREAMLITE's clean, dotless line of light makes great accent and task lighting simple to achieve. Featuring "COB" dotless technology for clean, dotless light, STREAMLITE now has a higher-output option and more color temperatures (CCT) than ever before, including static green and red, along with an IP-65 version suitable for wet locations.

We're also *dropping the price* to help protect your margins and keep your business healthy during this time of rapid inflation.

While STREAMLITE looks great in fixtures, they aren't needed for diffusion – so it's ideal for millwork and other tight spaces. Combined with our **terminal block connectors**, it is fast and easy to install in most applications.
