Introducing our newest line... **FEROXDESIGNS**

Bringing Innovation to Market

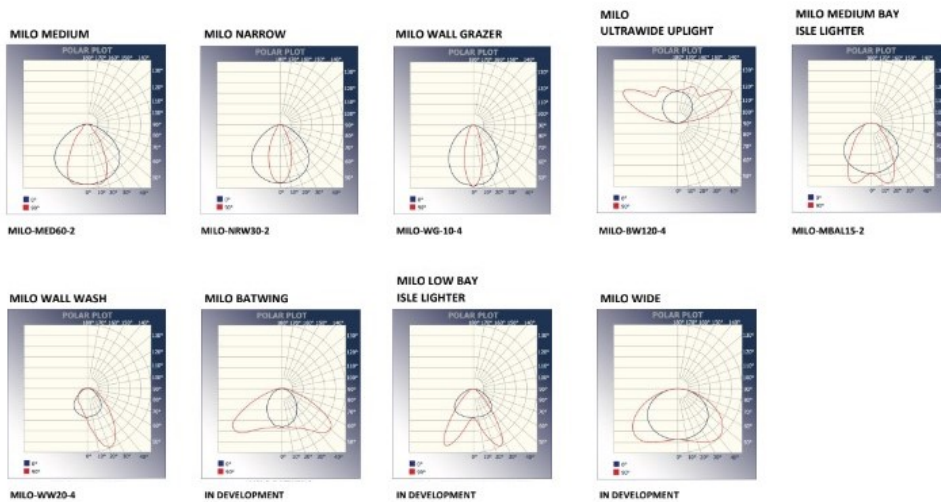

We produce award winning innovative designs by challenging the status quo, blending the finesse of industrial design with the complexities of engineering.

MILO™

The MILO™ is an extruded near-field optical TIR lens system originally designed around Zhaga LED board standards, and compatible with a wide range of medium powered LED PCB applications. MILO™ comes in several light shaping designs, and snaps into your luminaire providing customers with more beam output options, from their new or existing product line.

Product & Ordering Data

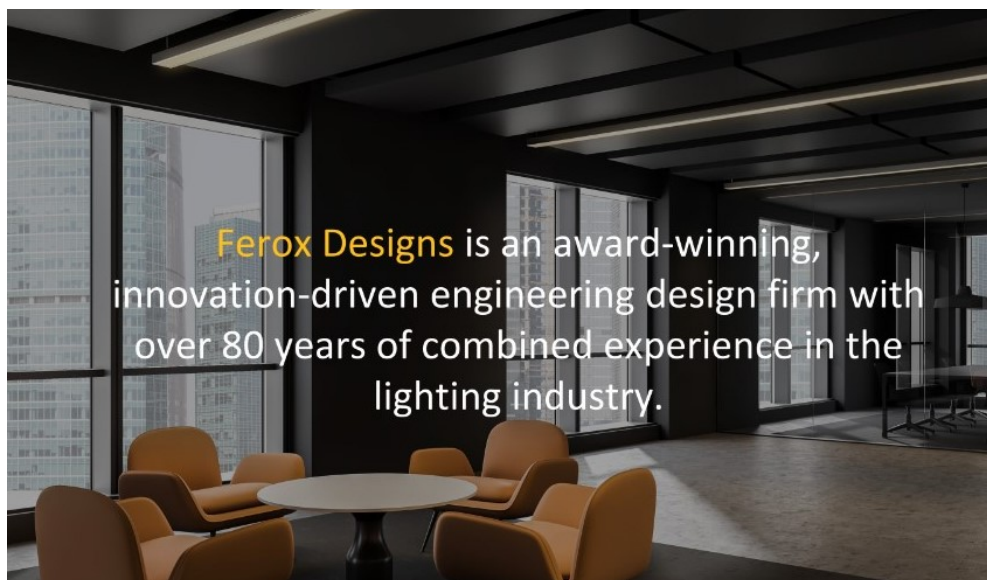

The Need

The demands of architects, engineers, and lighting designers for high-performance, cost-effective linear lighting products have risen alongside the requirements set by both national energy code guidelines and ever more exacting client specifications.

Professionals in the lighting industry are looking for a product that:

- Provides an OEM with a broader product offering and improvement market share
- Specification grade lighting using existing products and new product releases
- Reduces manufactured costs per linear foot
- Improves luminaire efficiency and visual comfort percentages

IOTA Emergency Drivers for 347-480VAC Luminaires

Product samples are available for IOTA's **ILBHI Emergency Drivers** - the industry's **only full 347-480VAC** input emergency drivers. These award-winning solutions bring powerful emergency capability to higher voltage luminaire designs.

IOTA ILBHI Emergency Drivers features include:

- 10W and 15W models for Class 2 LEDs
- 20W and 30W models for Non-Class 2 55-250VDC LEDs
- Auto-sense forward voltage detection
- Constant power output across all rated forward voltages
- Monthly and annual self-diagnostics
- Registered for CA Title 20 applications
- Flex and non-flex designs
- UL Listed for both U.S. and Canada

See the full line of ILBHI models online at www.iotaengineering.com
