TSG Resolute is the largest die cutter servicing the lighting industry. We provide die cut

gasketing for waters seals, bug seals, light leaks, and bonding tapes. TSG Resolute die cuts diffuser films and thermal gap pads to work with demanding LED applications. We extruded acrylic profile lens and PVC light leak profiles, and we have the ability to add light diffuser films in line with our extrusion processes.

Alanod is renowned in the production of semi-finished products for reflectors in the lighting industry, they have developed into specialists for light control, glare control and homogeneous light distribution – niche-specific and modular. With their highly reflective and transmission surfaces for LED light fixtures, traditional light sources, UV light applications and greenhouse lighting (as well as daylight solutions), Alanod contributes to creating the right light. Alanod offers a wide, standard product range of high-quality, anodised surfaces with a wide variety of properties: reflective from matte to glossy, recyclable, coloured, scratch-resistant, antistatic and paintable.
